PRODUCT ENGINEERING

PUBLISHED MONTHLY

INDEX TO VOLUME I

January to December, 1930

PUBLISHED BY THE McGRAW-HILL PUBLISHING COMPANY, INC.
Tenth Avenue at 36th Street
New York, N .Y.

January 1-50
February 51-100
March 101-150
April 151-200
May 201-250
June 251-300
July 301-350
August 351-400
September 401-450
October 451-498
November 499-546
December 547-593

* Illustrated

Accounting:
Record of job delays. G. H. Gunn..*333
Air Compressors:
Eliminating water cooling in portable air compressor. W. W. Warner ...*562

Airplanes:
Aircraft "bench designing." G. H. Gunn 332
Airplane design to meet specific conditions (Tanager). R. R. Osborn..*152
Design trends in aviation..... 230
Developments in airplane design.....*243
High strength-weight ratios turn airplane designers toward metals. L. E. Neville 421

Aluminum:
Aluminum cranes. E. C. Hartmann..*558
Blast hardened. P. B. Swinton..... 366
Electric railway cars go to aluminum. M. Buck 423
Notes on aluminum 456
Organization for materials research. J. D. Edwards *324
Pressed steel and aluminum for bus bodies and chassis. E. F. Theisinger. 422
American Foundrymen's Assn.—Meeting... 270

American Society for Testing Materials:
Meeting in Atlantic City 307

Appearance and Finishes:
Applied art in metal products. Colin Barrett *23
Art applied machinery *327
Built-in eye appeal has sales value. N. Bel Geddes *478
Decalcomania for product marking and ornamentation *77
Economy and durable colors with enamel. E. J. Cole 556
Lacquer finishes *276
Name plates, the finishing touch to the product. F. Weindel, Jr.....*177
New field of finishes. C. G. Fink... 517
Originality and refinement in electrical appliances. Luhr & Berggren....*472
Possibilities of molded products. G. S. Brady *227
Product needs color. D. R. Dohner..*427
Some developments in finishing materials. F. G. Oswald..... 468
Symbols for machine finishes. C. R. Whitehouse 333
Vitreous enamels. C. D. Clawson....*127
What to specify in finishes and why. F. G. Oswald *576
Why black tops? P. B. Swinton.... 520

Art:
Applied art in metal products. C. Barrett *23

Automobiles:
Automotive design notes. H. Chase. 486, 534
First American automobile. F. P. Devine 281
Five million a year for engineering (Chrysler Corp.). H. Chase.....*106
Free-wheeling in Studebaker cars....*386
Malleable iron castings in automotive design. H. A. Schwartz *410
1930 design trends in motor cars. H. Chase *75
Packard material specifications. H. Chase *264
Present car design indicted and a future car visualized. D. H. Montgomery *574
Three and four-speed gearsets *222

Beams:
End loaded beams with fixed supports. G. F. Nordenholt *360

Bearings:
Ball bearings. H. F. Peterson..... *28
Ball-seat pivot bearing. J. Dan.....*180
Bearing bronzes (Ref. Book Sheet).. 349
Bearing mountings in the Timken locomotive. T. V. Buckwalter.....*412
Commercial types of roller bearings (Ref. Book Sheet) *149
Oil leak from bearings prevented. G. W. Dunham *280
Pivot bearings. P. H. White..... *80
Preloaded ball bearings. H. E. Brunner.*162
Vibration from friction. P. B. Swinton 468

Belts:
Belt horsepower charts (Ref. Book Sheets) 249, 299
Charts for stepped cone pulley drives (Ref. Book Sheet) 545
On small pulleys. G. A. Rhoades.... 180
Relation of belt stress to pulley diameter. Emory Kemler 311
Uniform power transmission with V-belts. R. E. S. Geare.....*518
V-belt as a driving medium. W. A. Meyer *114
Beryllium for aircraft..... 17

Bolts:
Chart for determining bolt diameters (Ref. Book Sheet) 99

Book Reviews:
Airplane mechanics rigging handbook. R. S. Hartz 157
Aluminum industry. J. D. Edwards and others 266
Applied mechanics. A. P. Poorman.. 266
Arithmetic of electricity. T. O'Connor Sloane 157
Automobile steels. Dr. A. Muller-Hauff and Dr. Karl Stein..... 266
Balancing of engines. W. E. Dalby.. 55
Bearing metals and bearings. W. M. Corse 479
Calculus. E. J. Miles..... 306
Calculus. H. H. Dalaker and H. E. Hartig 157
Dictionary of color. A. Maerz and Rhea Paul 374
Die-casting practice. Marc Stern.... 374
Engineering kinematics. W. G. Smith. 374
Hydro-extractors—their safe construction and equipment 34
Impurities in metals. C. J. Smithells. 561
Ingenious mechanisms for designers and inventors. Ed. by F. D. Jones. 479
Lectures on steel and its treatment. J. F. Keller 216
Machine design. P. H. Hyland and J. B. Kommers 34
MacRae's Blue Book and Hendricks' Commercial Register 55
MacRae's Blue Book and Hendricks' Commercial Register 511
Manufacture of steel sheets. E. S. Lawrence 479
Materials of engineering construction. F. W. Roys 266
Materials handling equipment. Ed. by J. Tournier 34
Mechanical engineering laboratory practice. C. E. Shoop 216
Mechanical engineers' handbook. L. S. Marks 511
Mechanics. J. E. Boyd..... 561
Nature of the physical world. A. S. Eddington 34
Pictorial drafting. J. H. Hills..... 157
Practical radio construction and repairing. J. A. Moyer and J. F. Wostrel 126
Principles of engineering economy. E. L. Grant 374
Principles of iron founding. Richard Meldenke 306
Report writing. C. G. Gaum and H. F. Graves 34
S.A.E. Handbook 306
Simple aerodynamics and the airplane. C. N. Monteith 374
Textbook of the materials of engineering. H. F. Moore 511
Theory of the potential. W. D. MacMillan 479
Thurston. Robert Henry. W. F. Durand 126
Weld design and production. R. E. Kinkead 479
Work routing in production. J. Younger 157

Cable:
Calculating drum cables. A. A. Craven *105
Effective cable fastenings. A. S. Rairden *430
Wire insulating machine *174
Cadillac-LaSalle—how their engineering is organized. H. Chase 6

Calculus:
Mechanizing the calculus. J. M. Barr.*569

Castings:
Basic facts in die-casting design. M. Stern *121
Designing for aluminum die castings. D. B. Hobbs *60
Malleable iron castings in automotive design. H. A. Schwartz *410
Malleable iron castings—some design precautions. F. J. Oliver.....*214
Unit design in castings *82
Celluloid—why not celluloid? J. A. Pouch 431
Chain drives—English machine uses.....*371

Chains:
Articulated linkage. E. J. Tangerman *133

Clutch:
Centrifugal clutch design. G. W. Dunham *231
Daimler hydraulic clutch. Herbert Chase 380
Disk clutch design applications. G. E. Pope *210
Saving space by the use of friction clutches. S. H. Simon *454
Color. See Appearances and Finishes.
Copper-base forgings and die-pressed parts. Herbert Chase *362

Corrosion:
Recent corrosion-resistant alloys (Ref. Book Sheet) 497

Costs:
Economy with high priced materials.. 30

Cranes:
Aluminum cranes. E. C. Hartmann..*558

Decalcomania—for product marking and ornamentation *77

Design:
Designers need shop experience. W. R. Needham 326
Designing on schedule *406
Development procedure for machine tools. E. C. Bullard *220
Disk clutch design applications. G. E. Pope *210
Expensive cheapness. J. A. Covington. 432
Following the design through. F. M. Williamson 176
Incentive for designers. C. R. Whitehouse 573
Incentive for designers. C. H. Willey. 529
Perspective in design. C. B. Gordon-Sale 380
Problems in woodworking machines. R. A. Williams *233
Redesign—cast-iron feed mill *22
Redesign for light weight (Traveling crane). F. V. and E. C. Hartmann).*176
Redesign for pressed construction. V. B. Chase *74
Redesign for production and appearance (Radio). H. W. Baukat....*109
Traditions about designing. J. A. Covington 528
What are the other reasons? A. W. Forbes 481
What price experience? G. H. Gunn.. 281

Dies:
Copper-base forgings and die-pressed parts. Herbert Chase *362
Distributors for coil winding. D. C. Robson *260, *308
Drafting. See Drawings.

Drawings:
Aid to rapid inking. A. W. Eidman.. 381
Checking drawings. F. B. Hart.... 182
Checking drawings. B. Matthews.... 82
Checking drawings. C. G. Williams.. 230
Decimal equivalent chart..... 207
Direct reading scales. C. G. Williams.. 282
Ditto versus blueprints. J. R. Hillyer 529
Draftsmen's calculations. A. W. Knight 323
Draftman's scales. F. B. Faulkner.. 213
Drawing a tangent to a curve. W. J. Charles *80
Drawing dimensions. A. W. Knight.. 330
Engineering change record. L. Coon.. 432
Erasing on drawings..... 30
Handy drawing rack. G. A. Fries...*182
How product changes are recorded. T. H. Smith 575
Improved protractor. Morton Schwam 330
Improved T-square. E. W. Errick..*280
Long tracings. M. Schwam..... 181
Misinterpreted specifications. J. A. Tobey 131
Numbering drawings. D. D. Demarest 332
Numbering drawings. H. T. Kinnear.. 572
Numbering drawings. E. B. Nichols..*481
Pencil pointer for the draftsman. H. L. Wheeler 331
Preparing for erasing. C. Falik..... 431
Protecting tracings. Morton Schwam.. 381

L605.1
P943

565206
293871

Protection for the drafting board. A. M. Navarette *475
Rapid method of cross-hatching 31
Record of job delays. G. H. Gunn .. 333
Recording changes on drawings. G. H. Gunn 283
Scale for the mechanical draftsman. G. L. Guillet *132
Securing simplicity in an engineering organization. D. E. Gray *364
Speeding up drafting work. G. H. Gunn 433
Square roots of fractions. H. Greenleaf 331
Tentative lettering standard distributed for criticism 45
Third dimension on a single view. B. Spector 572
Tolerance indicator for use in design .. *32
Drive, simple non-reversing. P. H. White .. 573

Editorials:

Appearance counts 284
Customer be pleased! 335
Definiteness needed in specification ... 136
Designing safety into machines 236
"Do it that way!" 576
Does it look right? 236
Down to fundamentals 435
Engineers and the social structure .. 284
Engineers as executives 237
Fifty years of engineering 187
For what do buyers look? 88
How much shop training? 383
How to specify the color? 531
How's business? 334
In the ruck?—or out front? 576
Is engnieering a profession? 285
Is a depression necessary? 136
Leap after looking 631
Light weight in moving parts 236
Look to the product 38
Lubricants must be selected first 576
Metal minded 482
Modern art in the product 88
More engineering—more profit 186
More and better 383
Motion study by motion pictures 482
Motion study and machine design 187
Must we import designers? 424
New designs for old .. 89, 137, 187, 237, 285, 335, 531, 577
New thoughts for old 435, 483
No birds in last year's nest 530
Non-metals in the product 137
Paid amateur or professional? 136
Product engineer's interest in equipment replacement 89
Progress waits on product engineering 382
Quiet for the designer 483
R-101 530
Silence! 435
Standards for specification 89
This depression business 434
Time for motor standards 186
Tip from New England 577
Too much specialization 88
Trying competing products 284
Two strokes ahead 335
Valuable by-product 334
Who designates the lubrication? 334
Who should design the package? 186
Why cramp the designer? 38
Will you share in prosperity? 382

Electric Cooking:

Electrochef. W. Noble *71

Electrical Appliances:

Originality and refinement in electrical appliances. Luhr & Berggreen *472
Electron tube. O. H. Caldwell 217

Enamel:

Economy and durable colors with enamel. E. J. Cole 556
Vitreous enamels. C. D. Clawson *127

Engineering Council:

Designating materials in parts 118
Getting action on standards 18
How much customer contact for the designer? 218
Legalized engineering? 268
Shall past advertising control development? 68
Shall we buy or make parts? 168

Engineering Management:

Designing on schedule *406
Development procedure for machine tools. E. C. Bullard *220
How Cadillac-La Salle engineering is organized. Herbert Chase 6
How Hoover handles product development. D. G. Smellie 460
Laboratory line-up for vacuum cleaners. D. G. Smellie *521
Securing simplicity in an engineering organization. D. E. Gray *364

Engineers and Engineering:

Charts for solving engineering equations. (Ref. Book Sheets) 399
Elderly engineer's place 31
Legalized engineering. G. A. Fries ... 381
Licensed engineering. C. A. Koerner .. 432
Occasional customer contacts valuable. W. T. Fishleigh 331
Weakness and strength. P. B. Swinton 116

Engines:

Automobile design with engine in rear. D. H. Montgomery *574
Junkers develops an aircraft Diesel. K. O. Wittmann *367
Kinner modern aircraft engine *35
Locomotor. C. Faverty *320. *469
Rear-end engines. C. H. Franklin 433
Reasons behind the sixteen-cylinder Cadillac. E. W. Seaholm *52
Vanishing power. P. B. Swinton 256
Engines. See also Motors.

Extractor:

Vibration, corrosion, safety factors in centrifugal extractor design. C. F. Meyer *502

Feeding Machinery:

Mechanical feeds for one-at-a-time production. C. F. Smith *462

Fiber:

Hard vulcanized fiber for parts. E. A. Russell *418
Hard vulcanized fiber specifications. E. A. Russell 481
Finishes. See Appearance and Finishes.

Forging:

Copper-base forgings and die-pressed parts. H. Chase *362
Strength in upset forging *131

Furniture:

Skyscraper desk. D. E. Hunter *368

Gages:

Strain gages. F. G. Tatnall *158

Gaskets:

Their function, application, and design. J. B. Victor *274

Gears:

Cams and spiders for intermittent motion. D. D. Demarest *208
Comments on gear tooth design 433
Compression chord for airplane landing gear *133
Considerations in the design of spur gear teeth. F. A. Mickle *314
Gear case designed for arc welding. A. Davis *231
Geared speed reducers. C. G. Wennerstrom *553
Heavy-type landing gear design. C. O. Wittmann *180
Modified gear ratio formulas. W. A. Winters 166
Simple gear ratio formula. J. Best .. 82
Simplified gashing angle formula. M. Gottlieb 173
Three and four speed gearsets *222
Worm gear drives. E. Buckingham .. *9
Worm gear drives No. 2. E. Buckingham 63
Worm gear drives No. 3. E. Buckingham *110
Worm gear drives No. 4. E. Buckingham *171

Glass:

Pressed glass in metal products. D. E. Gray *267

Hoover engineering and product development. D. G. Smellie *460, *521

Iron:

High-strength cast iron. J. S. Vanick *21

Lacquer finishes *276
Laminated molded materials. G. H. Mains *14

Lamp:

Customer is the designer. L. C. Doane *524
Loader-Westinghouse coal loader *195

Locomotives:

Bearing mountings in the Timken locomotive. T. V. Buckwalter *412
Flexible drive and gears *438
High-pressure locomotive boiler design *183
Hundred years of locomotive design .. *12
James Archbald locomotive; interview with J. E. Muhlfeld by Geo. F. Nordenholt *202
Locomotor. C. Faverty *320, *469

Looms:

Cotton King Loom *102
Seat of the trouble. P. B. Swinton .. 17

Machinery:

Advances in textile machinery 131
Art applied to machinery *327
Automaticity need not be built in: standard magazine feeds can be added. C. F. Smith *357
Century of harvesting machinery *134
Checking machine layouts with charts. D. D. Demarest 409
Design problems in woodworking machines. R. A. Williams *233
Development procedure for machine tools. E. C. Bullard *220
Lifting provisions for machine tools .. *130
Low price and quick delivery. H. F. Kneen *480
Standard mechanical movements *272, *312
Strength and wear resistance demanded in construction machinery. W. G. Bowman 422
Three is a crowd. P. B. Swinton 319
Tools slides fed by toggle. H. R. Legrand *232
Vibration in a dynamically balanced machine. P. B. Swinton 156

Materials:

Applied art in metal products. C. Barrett *23
Bearing bronzes. (Ref. Book Sheet) .. 349
Copper-base forgings and die-pressed parts *362
Designing for aluminum die castings. D. B. Hobbs *60
Food mixing machine and emergency vault door of stainless steel *512
Hard rubber. S. P. Fisher *458
Hard vulcanized fiber for parts. E. A. Russell *418
High-strength cast iron. J. S. Vanick *21
Improved metals affect all products .. 421
Laminated molded materials. G. H. Mains *14
Malleable iron castings in automotive design. H. A. Schwartz *410
Malleable iron castings—some design precautions. F. J. Oliver 214
Materials research for improved product. W. Fondiller *124
Pressed glass in metal products. D. E. Gray *267
Progress in metals as seen at the A.F.A. and A.I.S.I. meetings. Geo. S. Brady 270
Progress in materials as seen at the A.S.T.M. meeting 307
Progress in materials as seen at the A.S.T.M. and I. M. meetings. G. S. Brady *160
Progress in metals as seen at the A.I.M.E. meeting. Geo. S. Brady .. 120
Recent corrosion-resistant alloys. (Ref. Bk. Sheet) 497
Rolled zinc for drawn and stamped parts. R. M. Curts *117
Sheet metal sample plates. J. R. Henhoefer 528
Trends in cast alloy steel. Lorenz and Zuege 560
Walnut in metal products. G. N. Lamb. *167
Metals. See Materials.

Molding:

Laminated molded materials. G. H. Mains *14
Possibilities of molded products. G. S. Brady *227
Steel molding press platens. T. M. Namiky 230
Month in product design 44

Motors:

Flange or foot-mounted motors. H. Chase *84
Securing mechanical variations with interchangeable units. J. L. Brown .. *505
Interchangeable flange mountings and belt drives. L. J. Radermacher ... *182
Motors. (See also Engines)

Nameplates:

The finishing touch to the product. F. Weindel, Jr. *177
National Metal Congress 534
News of the metal markets .. 45, 95, 145, 195, 239, 287, 337, 387, 439, 487, 535, 581

New Materials and Parts:

See page 591

Parts and Units:

Ball bearings. H. F. Peterson *28
Best article at the best price. A. R. MacLagan 330
Charts for determining bolt diameters. (Ref. Book Sheet) 99
Disk clutch design applications. G. E. Pope *210
Electron tube. P. H. Caldwell 217
English machine uses chain drives ... *371
Flange or foot-mounted motors? H. Chase *84
Gaskets—their function, application and design. J. B. Victor *274
Industrial wheels are specialized units. W. F. Heesch *508
Preloaded ball bearings. H. E. Brunner *162
Saving space by the use of friction clutches. S. H. Simon *454
Securing mechanical variations with interchangeable units. J. L. Brown. *505
Standard mechanical movements *272, *312
Three and four-speed gearsets *222
Uniform power transmission with V-belts. R. E. S. Geare *518
V-belt as a driving medium. W. A. Meyer *114

Patents:

Agricultural machinery recently patented *83
Electrical parts and accessories recently patented *33

Plating:

New field of finishes. C. G. Fink ... 517

Press:

Design of Miller Simplex cylinder press. A. W. Barrett *352

Product Design:
Airplane design to meet specific conditions (Tanager). R. R. Osborn..*152
Automobile design with engine in rear. D. H. Montgomery *574
Century of harvesting machinery....*134
Completely electrified typewriter. Thompson & Crumrine *513
Customer is the designer. L. C. Doane.*524
Design of Miller-Simplex cylinder press. A. W. Barrett *352
Designing for severe service. E. F. Norelius *252
Electrochef. W. Noble.....*71
Eliminating water cooling in portable air compressor. W. W. Warner....*562
Engineering for production — Royal typewriter. B. J. Dowd and others.*302
Household machine. C. Steenstrup... *2
How customers' customer needs affect production machinery design. A. Palmer *102
Hundred years of locomotive design.. *12
James Archbald locomotive; interview with J. E. Muhlfeld by Geo. F. Nordenholt *202
Mechanical toys call for real design. J. E. Cuff *548
New products to fill unoccupied buildings. D. G. Phelps *451
Originality and refinement in electrical appliances. Luhr & Berggren.....*472
Reasons behind the sixteen-cylinder Cadillac. E. W. Seaholm..... *52
Skyscraper desk. D. E. Hunter.....*368
Thirty years of sewing machine design *56
Vibration, corrosion, safety factors in centrifugal extractor design. C. F. Meyer *502
Where materials count—viscolizer. H. S. Fielder *401

Pulley:
Charts for stepped cone pulley drives. (Ref. Book Sheet) 543
Cone pulley design. W. E. Johnson.. 424

Pumps:
Propeller type unit.....*359

Radio:
Die castings improve radio design. DeCola and Jeffrie.....*431
Mechanical trends in radio. G. S. Brady *317

Ratchet:
Gravity ratchet. F. H. Mayoh.....*132
Records—how long kept? C. N. Fletcher.. 181
Fletcher 181
Redesign, see Design.

Reference Book Sheets:
Bearing bronzes 349
Belt horsepower charts.....249, 299
Chart for determining bolt diameters. 99
Charts for solving engineering equations 390, 593
Charts for stepped cone pulley drives. 545
Commercial types of roller bearings..*149
Definitions of terms used in specifications 199
Helical springs 49
Material weight comparison..... 449
Recent corrosion—resistant alloys... 497
Refrigerator, electric. C. Steenstrup..... *2

Research and Development:
Community research in Japan. F. H. Colvin *67
Five millicn a year for engineering. H. Chase *106
Handling the product research. B. H. Witherspoon *416
Organization for materials research. J. D. Edwards *324
Packard material specifications. H. Chase *264
Strain gages. F. G. Tatnall.....*158
This business of research. H. N. Blackmon *566

Rivets:
Rivet head failures. P. B. Swinton.. 66

Road equipment:
Design developments in road machinery. G. S. Brady *58

Rubber:
For servere service. J. A. Covington.. 333
Hard rubber. S. P. Fisher.....*458

Schedules:
Designing on schedule *406

Screw thread:
Decline of the U. S. S. thread..... 31
Sewing machines—thirty years of design.. *56

Shafts:
Built-up shafts for impact resistance. G. F. Nordenholt 258
Pressed fits on power shafts. P. B. Swinton 226
Shaper table — inclined leg on table. H. R. LeGrand *332
Ship—Weight saving in German "mystery" ship 30

Society of Automotive Engineers:
Twenty-fifth anniversary 291

Society for the Promotion of Engineering Education:
Annual meeting 375

Speed reducers:
Automatic speed reducer. H. B. Coley *480
Geared speed reducers. C. G. Wennerstrom *553

Springs:
Capacity and deflection of helical springs. (Ref. Book Sheet)..... 49

Standardization:
Commercial types of roller bearings. (Ref. Book Sheet) *149
Definitions of terms used in specifications. (Ref. Book Sheets)..... 199
Fancy specifications. Joseph Bell... 528
Materials standardization. J. K. Olsen 432
Standard names for parts..... 281

Steam:
Locomotor. C. Faverty.....*320, *469

Steel:
Chemical industry started the stainless steel age. S. D. Kirkpatrick..... 421
Food mixing machine and emergency vault door of stainless steel.....*512
High-tensile steels and special alloys for power equipment. A. D. Blake 423
Pressed steel and aluminum for bus bodies and chassis. E. F. Theisinger 422
Recent corrosion — resistant alloys. (Ref. Book Sheet) 497
Trends in cast alloy steel. Lorenz & Zuenge 560

Stresses:
Working out the factor of safety. A. M. Wahl 465
Stresses in symmetrical tubes. G. F. Nordenholt *184, *225

Technical design:
Agricultural machinery recently patented *83
Aluminum cranes. E. C. Hartmann..*558
Automaticity need not be built in. C. F. Smith *357
Basic facts in die-casting design. M. Stern 121
Bearing mountings in the Timken locomotive. T. V. Buckwalter.....*412
Cam and crank layout. G. J. Frey..*170
Design developments in road machinery. G. S. Brady *58
Design problems in woodworking machines. R. A. Williams.....*233
Designing special machines around standardized commercial parts. C. E. Bilton *174
Distributors for coil winding. D. C. Robson *260, *308
Electrical parts and accessories. (Patents) *33
Graphical estimation of weights. Victor Tatarinoff 257
Kinner modern aircraft engine..... *35
Laundry machinery fabricated arc welding. M. Taylor *405
Locomotor. C. Faverty.....*320, *469
Mechanical feeds for one-at-a-time production. C. F. Smith.....*462
Mechanical trends in radio. G. S. Brady *317
1930 design trends in motor cars. H. Chase *75
Standard mechanical movements *272, *312
Welded construction effects economies. M. C. Smith *372
Welded joints are safe. E. J. Tangerman *457

Templets:
Celluloid templets 32
For gear drawing. K. Stover..... *81
Wrench clearance templet *32

Theory:
Belt horsepower charts. (Ref. Book Sheets) 249, 299
Built-up shafts for impact resistance. G. F. Nordenholt 258
Cams and spiders for intermittent motion. D. D. Demarest.....*208
Charts for solving engineering equations. (Ref. Book Sheet)..... 593
Checking machine layouts with charts. D. D. Demarest 409
Cone pulley design. W. E. Johnson.. 424
Considerations in the design of spur gear teeth. F. A. Mickle.....*314
Damping factor in vibrations. A. L. Kimball *499
End loaded beams with fixed supports. G. F. Nordenholt *360
Geared speed reducers. C. G. Wennerstrom *553
Helical springs. (Ref. Book Sheets) 49
Mechanizing the calculus. J. M. Barr.*569
Stresses in symmetrical tubes. G. F. Nordenholt *184, 225
Working out the factor of safety. A. M. Wahl *465
Worm gear drives No. 1, 2, 3, 4. E. Buckingham *110

Toys:
Mechanical toys call for real design. J. E. Cuff *548

Tractors:
Designing for severe service—Monarch tractor. E. F. Norelius..... 252
High speeds for tractors. G. B. Stuart 81

Tubes:
Stresses in symmetrical tubes. G. F. Nordenholt 225

Typewriter:
Completely electrified typewriter. Thompson & Crumrine *513
Engineering for production — Royal typewriter. B. J. Dowd and others..*302

Unemployment and product engineers.... 547

Vacuum cleaner:
Laboratory line-up for vacuum cleaners. D. G. Smellie.....*521

Valves:
Gate valve design. P. J. McCullough.*181

Vibration:
Damping factor in vibrations. A. L. Kimball *499
Viscolizer. H. S. Fielder.....*401

Weight:
Graphical estimation of weights. Victor Tatarinoff 257
Materials weight comparisons. (Ref. Book Sheets) 449
Weight constants for various shapes of rod stock. J. K. Olsen..... 523

Welding:
Laundry machinery fabricated by arc welding. M. Taylor *405
Rivetless cargo vessel *133
Steam turbine made from steel plates.*438
Welded construction effects economies. M. C. Smith *372
Welded joints are safe. E. J. Tangerman *457

Wheels:
Industrial wheels are specialized units. W. F. Heesch *508

Zinc:
Finishes for zinc products..... 37
Rolled zinc for drawn and stamped parts. R. M. Curts.....*117
